What are the risks and what could I get in return? Summary Risk Indicator

The risk indicator assumes you keep the product until 14 July 2020. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because Handelsbanken is not able to pay you. We have classified this product as 2 out of 7, which is a low risk class. This classification takes into consideration two elements: 1) the market risk - that rates the potential losses from future performance at a low level; and 2) the credit risk which estimates that poor market conditions are very unlikely to impact the capacity of Handelsbanken to pay you. You are entitled to receive back at least 90.909% of your capital. Any amount over this, and any additional return, depends on future market performance and is uncertain. However, this protection against future market performance will not apply if you cash-in before 14 July 2020. If Handelsbanken is not able to pay you what is owed, you could lose your entire investment.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if Handelsbanken is unable to pay out?

This product is not protected by any investor compensation or guarantee scheme. If Handelsbanken is unable to make a payment and/or is in default, you may lose some or all of your invested amount and any payment may be delayed.

What are the Costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for 2 different holding periods. They include potential early exit penalties. The figures assume you invest SEK 100,000. The figures are estimates and may change in the future.
